

We recorded at least 4 species of bats which are clearly labelled on the google file as follows

Cpip = common pipistrelle

Spip = soprano pipistrelle

Pip-sp = common or soprano pipistrelle

Daub = Daubenton's

Noc = noctule

Myotis = could be either Daubenton's, Whiskered or Brandt's and possibly Natterer's (this is a very difficult family to separate on call)

Query = is probably a Myotis but not sure. Sent to other bat group members for suggestions
