

RADCLIFFE CONSERVATION GROUP - NEXT WORK SESSION

We will be holding a work session on 20th November, the last one before Christmas so don't miss out! Note the switch to Sunday mornings because of the daylight factor. The plan is to continue path improvements at the foot of Hollow Well steps by making up and laying some path edging on the section where we laid bark in October (there is some stacked timber we can use from last winter's tree cutting along the riverbank). Some tools are available but if you can bring along a spade or a bow saw if you have one, that would be helpful. Please wear sensible footwear, preferably boots and bring a pair of work gloves with you. Meet at the Shelter in Rockley Memorial Park at 10:00 a.m., finish around noon.
