Dear Colleague

**PUBLIC CONSULTATION ON THE INTRODUCTION
OF MIXED CREWING AND ALTERNATIVE CREWING**

Nottinghamshire Fire and Rescue Service (NFRS) is carrying out a public consultation on behalf of the Fire Authority on proposals to introduce two new crewing models in Nottinghamshire. During the past 10 years, incident numbers have halved, with NFRS now attending around 10,000 incidents per year, of which approximately 4,000 are false alarms. The proposals are part of a review of operational delivery, that aims to keep all of the existing resources, but crew them more effectively, aligning availability of resources to the demand and risk we now face.

I have enclosed a copy of our consultation document, which contains information about the proposals and how to take part in the consultation process. We would welcome the views of your organisation and would appreciate it if you could share the consultation information through your communication channels.

The consultation process will close on **17 December 2017** and full details can be found at <http://www.opinionresearch.co.uk/nfrs>.

The Fire Authority will consider the outcomes from the consultation process at its meeting in February 2018.

Yours sincerely

John Buckley
