

Emergencies can happen at any time. The Parish Council are pleased to support the installation of **Bleed Control Kits** to go alongside our Community Defibrillators. We hope that they are never needed, but if they are, can help to save a life. In the event of an emergency; call 999 who

will provide the access code and full instructions until an ambulance can arrive. Special thanks to RBC Neil Clarke for providing funding and ROTPC Cllr Oliver Bere for this idea and installation. Anyone can use these, no training is necessary. We plan to hold a public familiarisation session in the New Year, together with another CPR/Defibrillator awareness session for those that missed out in November”
